## **AIRBORNE RADIO EQUIPMENT APPROVAL REQUIREMENTS**

To comply with Hong Kong Aviation Requirements HKAR-1 Sub-section 1.4-10 an application for the approval of an item of airborne radio equipment designed and manufactured outside Hong Kong must include the following information and documentation:—

1. A completed Form DCA 70.
2. Evidence as to whether the equipment is of a type approved by the airworthiness authority of the country of origin and a copy of the type approval test report.
3. Evidence of the approval standards to which the equipment has been certified together with one copy of a Declaration of Design and Performance in accordance with HKAR-1 Sub-section 1.4-8.
4. A copy of manual covering Installation, Maintenance and Overhaul.
5. A copy of the production test specification for the apparatus and evidence of the quality control procedures used in production.
6. Information regarding procedures for notification of modifications, the availability of spare parts, and the servicing arrangements which could be made available in Hong Kong.

The approval classification will depend on the standard of the equipment and the completeness of the required information.
