GENERAL NOTES

1. In an aircraft, 'NIGHT' means the time between half an hour after sunset and half an hour before sunrise. In a simulator, 'DAY' or 'NIGHT' requires the appropriate scene to be serviceable and in use.
2. A 'circuit' is the flight path around an aerodrome at a specified height which facilitates an aircraft's positioning from a point on the take-off path of a given runway to a point on the approach path of the same runway, from which a landing can be made.
3. 'Satisfactorily' means that the examinee is in full control of the aircraft at all times and that the successful outcome of a manoeuvre is never in doubt. 'Unassisted' means without verbal prompting or physical assistance with the flying controls.
4. 'Clean configuration' means with undercarriage and flaps retracted. 'Approach to land configuration' means with undercarriage extended, an intermediate flap setting and some power applied.
5. In an aircraft, 'simulated engine failure' means with engine controls set up for low power so as to represent a failed engine as nearly as possible. In a flight simulator any approved method for simulating engine failure may be used. The accelerate-stop tests required by this form should be carried out by initiating the simulated engine failure at a speed which will not hazard the safety of the aircraft.
6. The flying test for the Certificate of Test described in the Air Navigation (Hong Kong) Order 1995 comprises the items specified in the heavily outlined box unless prior agreement has been made with HKCAD.
7. Only Authorised Examiners holding written authorisation issued by HKCAD in respect of the aircraft and/or flight simulator type used for this test may sign for the satisfactory completion of any test on this form.
8. Applicants are reminded that the technical examination and flying tests may be undertaken in any order but both must have been satisfactorily concluded within 6 months immediately preceding the application for the grant of an aircraft rating.
9. The Certificate of Test will date from the completion of the "Boxed Items" mentioned as per Note 6.
10. The fee for the inclusion of an additional aircraft rating in a professional pilot's licence is contained in the Hong Kong Air Navigation (Fees) Regulations (Cap 448D). A crossed cheque for the required amount made payable to the 'Government of the Hong Kong Special Administrative Region' must be forwarded along with this form, unless prior payment arrangement has been made with HKCAD. Please note that the **application fee is required to be paid at the time of application and is non-refundable** even if the application is refused or withdrawn or otherwise ceases to have effect.
11. Certain items of this test may be carried out in an appropriate flight simulator which has been specifically approved for them by HKCAD. Test items so approved are enumerated in the relevant Flight Simulator Approval Code to be entered on this form.
12. Completed applications should be sent to the Personnel Licensing Office, Flight Standards and Airworthiness Division, Civil Aviation Department Headquarters, 1 Tung Fai Road, Lantau, Hong Kong. Your attention is drawn to the provisions of the Air Navigation (Hong Kong) Order 1995 in respect of documents, records and personal flying log book.
